INTRODUCTION

Welcome to **ANNT - A NEW NIGERIA TOKEN**, our Nigerian themed crypto project! We are excited to share with you our vision for a new, innovative and decentralized economy in Nigeria.

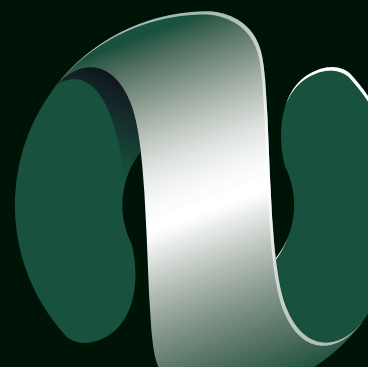

Our project is inspired by the inevitable revolution in the country, as the upcoming election promises a youth-motivated fresh government, one that will break away from the old order and pave the way for a new era of growth and prosperity.

Our project aims to be an experimental deflationary token on Binance Smart Chain, designed to promote financial inclusion and decentralization in Nigeria. With a total supply of **63 million** tokens and a minimum total supply of **23 million**, our token is a symbol of the hope and potential of Nigeria as it celebrates its 63rd year of independence.

At the core of our project is a belief in the power of blockchain technology to democratize finance and create a more equitable and transparent economy. We believe that by harnessing the power of decentralization, we can build a future where everyone has access to the same opportunities, regardless of their background or social status.

Our team is made up of a diverse group of individuals from different backgrounds, united by a shared passion for blockchain technology and a desire to make a positive impact in Nigeria. We are committed to building a community around our project and welcome all those who share our vision to join us on this journey.

If you have any questions or would like to learn more about our project, please do not hesitate to reach out to us. We look forward to working with you to build a brighter future for Nigeria.

MOTIVE

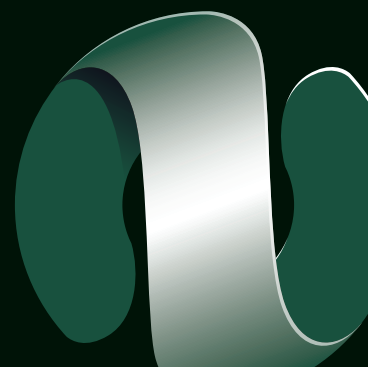

Our project, ANNT (A New Nigeria Token) is driven by a clear and ambitious motive - to empower the citizens of Nigeria by providing them with access to a decentralized and transparent economy through the use of blockchain technology.

We believe that the current financial system in Nigeria is in dire need of disruption, as it is riddled with inefficiencies, lack of transparency, and exclusion of large segments of the population. With ANNT, our goal is to provide a viable alternative that addresses these issues and enables greater financial inclusion for all Nigerians.

We aim to achieve this by decentralised wealth creation hence, why we built this token on the Binance Smart Chain, a high-performance blockchain network that allows for fast and low-cost transactions.

With ANNT, we aim to promote the use of cryptocurrency in Nigeria and encourage the adoption of blockchain technology for various use cases. In addition, we believe that ANNT has the potential to promote economic growth and development in Nigeria, by providing citizens with a new means of storing and transferring value, and by facilitating the creation of new businesses and industries that are built on blockchain technology.

Our project is not just about creating a new token, it's about creating a new future for Nigeria and Nigerians. We believe that with ANNT, we can help to build a more equitable, transparent, and decentralized economy that benefits all citizens.

VISION

At ANNT, our vision is to create a new, decentralized economy in Nigeria that is inclusive, transparent, and empowering for all citizens. We believe that the current financial system in Nigeria is in dire need of disruption, as it is riddled with inefficiencies, lack of transparency, corruption with impunity and exclusion of large segments of the population.

With ANNT, our goal is to provide a viable alternative that addresses these issues and enables greater financial inclusion for all Nigerians.

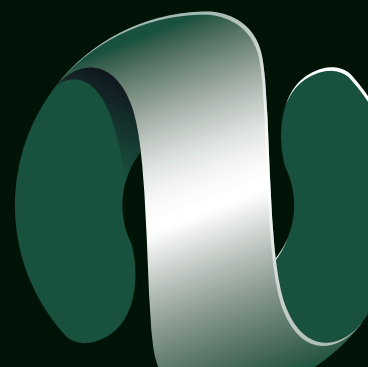

We envision a future where citizens of Nigeria have access to a decentralized and transparent economy through the use of blockchain technology. ANNT will be at the forefront of this change, providing a secure, fast, and low-cost means of storing and transferring value.

We also see ANNT as a catalyst for economic growth and development in Nigeria, by facilitating the creation of new businesses and industries built on blockchain technology. We believe that the adoption of ANNT and blockchain technology will lead to the creation of new job opportunities and the growth of the Nigerian economy.

In addition, we see ANNT as a powerful tool for promoting social and economic justice in Nigeria. By providing citizens with a new means of storing and transferring value, we believe that ANNT can help to reduce poverty and inequality and promote greater financial inclusion for all.

Overall, our vision for ANNT is to empower the citizens of Nigeria to take control of their financial future and build a more prosperous, equitable and decentralized economy. We are committed to making this vision a reality, and we look forward to working with you to achieve it.

Imagine our quintessential road construction project or an underground project in a functional future Nigeria, monitored and tracked on a blockchain, with multi-signatures especially with respect to the movement of funds. All involved must be doxxed and KYCed of course.

ROADMAP

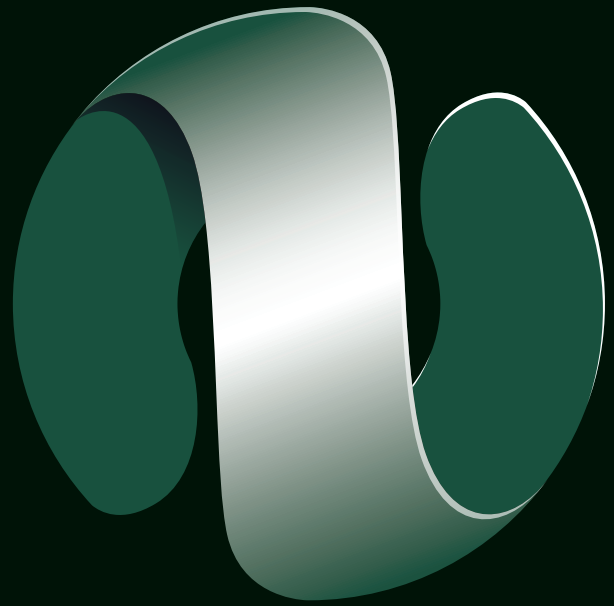

PHASE ONE

- ANNT development
- Website launch
- 500 telegram members
- Pancakeswap listing
- 300 holders
- LP token locked for 8 years
- ANNT awareness campaign
- First Nigerian charity project
- 1000 twitter followers
- Logo display on Trust Wallet
- Listing on Coinmarketcap
- Listing on Coingecko
- Third party audit

* Our roadmap is in no particular order, therefore, the phase in which the milestones appear do not really matter. However, we will endeavour to keep the community in the loop as the journey progresses.

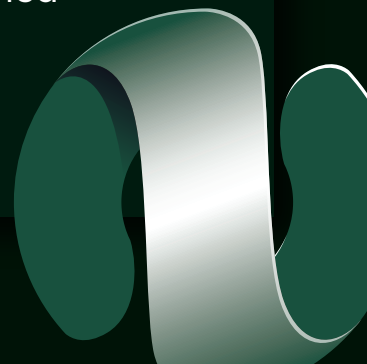

Thank you,

ANNT

PHASE TWO

- First community member aid
- CEX listing
- ANN themed NFT collection
- 1000 holders
- Min. Total Supply attained
- ANNT NFT competition
- First ANNT community project
- 10 million ANNT burned
- ANNT lottery
- Blockchain live project trial
- 40 million ANNT burned
- More utilities

TOKENOMICS

The tokenomics of this project, remains true as at launch and any subsequent change as it progresses will be reflected on our website. The changes expected based on the plan, at creation will be with the fees. This would likely be effected when the minimum total supply (**23 million ANNT**) is reached.

Why 63 and 23 million?

It is the year 2023 and a new Nigeria is upon us. The old rule must go, as Nigeria becomes **63** and our nation must begin to walk the path of greatness!

TOTAL SUPPLY

63M

MINIMUM TOTAL SUPPLY

23M

MAX TRANSACTION

50K

DEVELOPMENT FEE

3%

MAX WALLET

157.5K

LIQUIDITY FEE

3%

CHARITY FEE

2%

AUTO-BURN FEE

2%

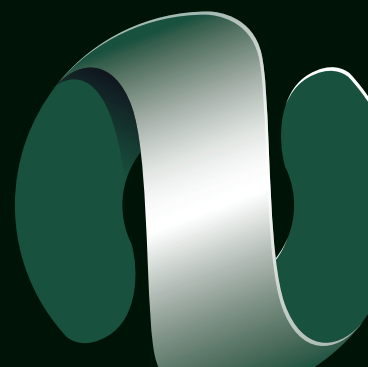

TOTAL FEE

10%

LP TOKEN LOCKED FOR 7 YEARS.

BURN 40 MILLION ANNT LEAVING 23 MILLION.

WE AIM TO DRIVE THE PRICE TO \$1 PER \$ANNT WITHIN 10 YEARS.

COMMUNITY

At ANNT, we believe that a community-driven approach is essential for the success and long-term growth of our project. We are committed to building a strong and active community around ANNT and welcome all individuals, regardless of their background or experience, to get involved and share their ideas and suggestions with us.

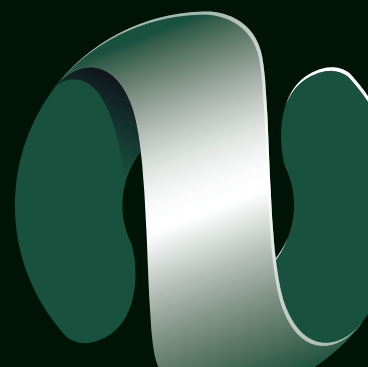

We understand that the success of our project is dependent on the engagement and support of our community. That's why we are dedicated to fostering an open, transparent and inclusive environment where all members can participate and contribute to the growth and development of the ANNT ecosystem.

One of the ways we plan to involve the community is by using a portion of our charity fee to support those in need, especially community members. We believe that by giving back to the community, we can create a positive impact and promote social and economic justice.

As the project grows, we are committed to finding new use cases for ANNT that will drive its value and utility. Once the minimum total supply has been reached, we will work closely with the community to identify new opportunities and develop innovative solutions that will benefit all members of the ecosystem.

We believe that by working together, we can create a decentralized economy that is inclusive, transparent, and empowering for all citizens of Nigeria. We are excited to embark on this journey and look forward to building a strong and vibrant community around ANNT.

Please do not hesitate to reach out to us with any questions or ideas you may have. We welcome all members of the community to get involved and contribute to the growth and success of the ANNT project.

23 MILLION AND BEYOND

As previously mentioned, the minimum total supply of tokens, as algorithmically designed, is 23 million. Once this supply is reached, several significant events will occur.

First and foremost, 40 million ANNT would have been sent to the "dead wallet" and the burning of more tokens, halted. This will result in a significant increase in the value of the token, making our project a household name not only in Nigeria, but potentially around the world.

In addition to the growth in value, we will also be able to roll out new utilities for the token, as decided upon by the community through voting. We will also increase our support for verifiable charities and organizations that focus on community development in Nigeria. Our ultimate goal is to make life easier for deprived communities by sponsoring developmental and environmental projects and creating tech education hubs that will be free of charge.

We believe that with the success of this project, we will be able to achieve these goals and more. Investing in our project is not only a smart financial decision, but also an opportunity to make a positive impact on communities in need and make Nigeria a country where the son of nobody can be somebody, without knowing anybody.

Lastly, we currently have one person who is fully doxxed on this project for transparency and investors confidence. He goes by the name Samuel Obior. Name can be looked up on LinkedIn for more information. However, on reaching the 23 million mark, we hope to be able to afford a team of reputable devs, designers and so on and they will all be doxxed as well, to help with the journey, moving forward.
